

Work Injury & Death: When Standalone Training Isn't Enough

Work safety compliance violations result in injury and death every day. At SumTotal and Skillsoft, we want to help you do something about it.

374M

Nonfatal accidents occur on the job that require extended absences from work.¹

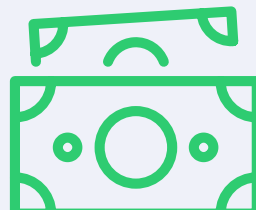

5,479

People die at work around the globe every day. That's well over **2 million employee deaths each year**.¹

\$3T

The annual cost to the global economy of preventable work-related accidents.²

Let's put that in perspective

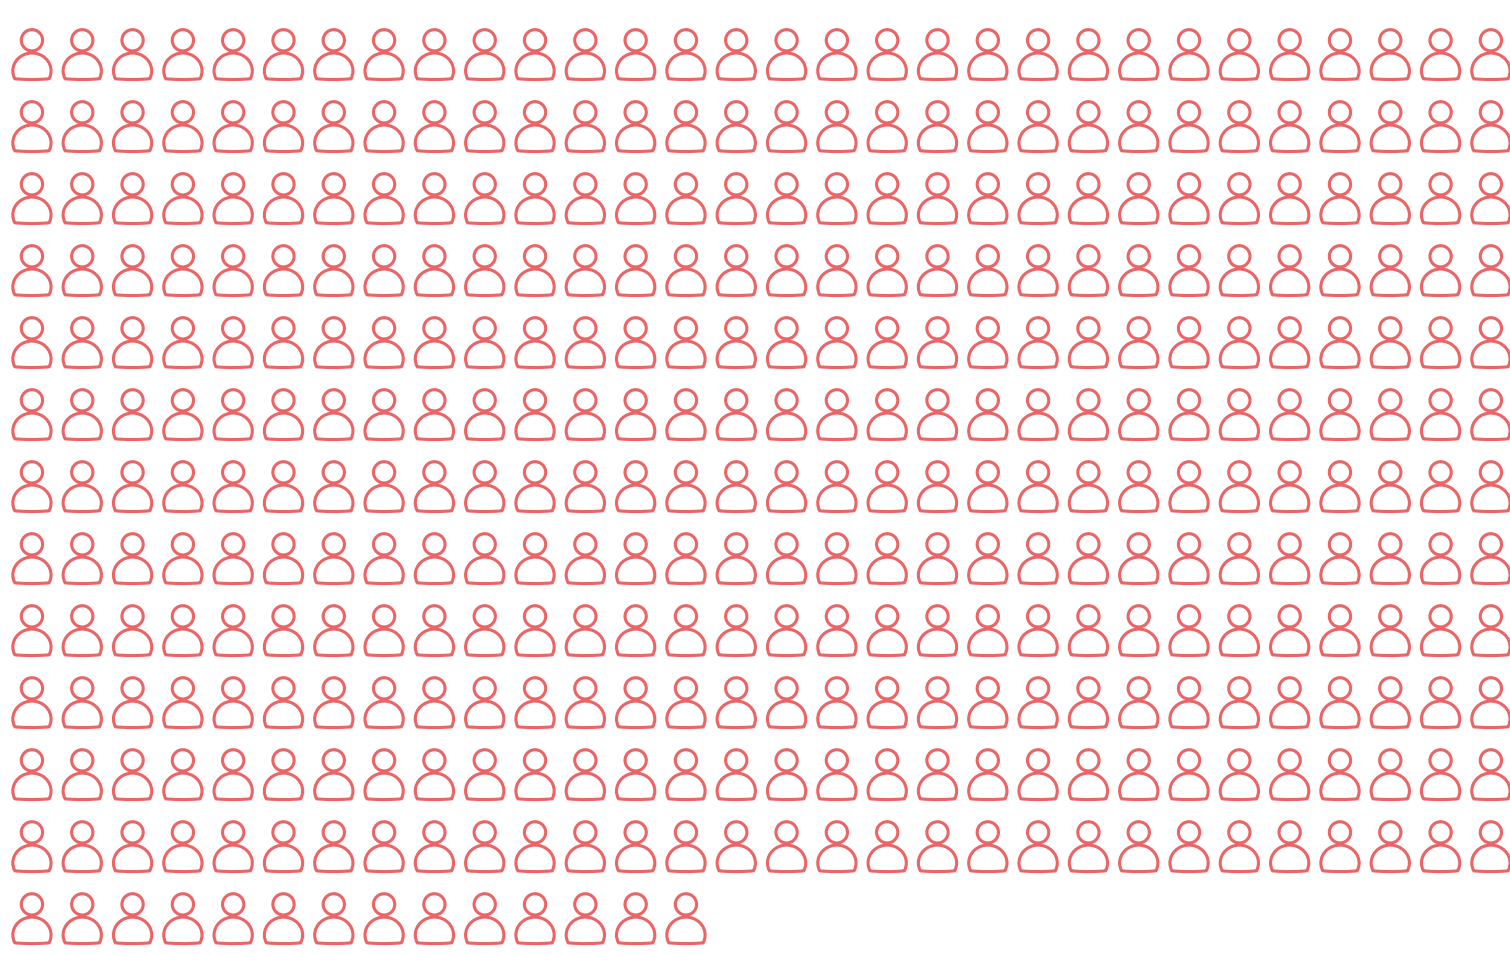

= 1MM deaths

167,000: armed conflict deaths per year²

2.78MM: workplace deaths per year¹

374MM: workplace accidents per year¹

The industries most at risk³

Construction

Transportation & Warehousing

Agriculture

Professional & Business Services

Inadequate and unenforced training are leading causes of preventable workplace accidents and fatalities.

Research shows as much as **68%** of fatality cases in the US were because of inadequate training procedures and **26%** because such training was not enforced.³

A unified compliance program is the first line of defense to reduce accidents at work, **and these are the three things it needs to have.**

SumTotal and Skillsoft are leading the movement towards safer workplaces around the globe. Accidental injuries and deaths at work are unacceptable, and we're committed to advancing technology to reverse this grievous reality.

Join the World's Only HCM Community that is natively and uniquely developed for even complex compliance requirements inclusive of Workforce Management, Learning, and Skillsoft Compliance courses.
