

TotalCMS provides an integrated environment for developing, managing, and delivering personalized learning content. TotalCMS gives content developers, including instructional designers and subject matter experts, the ability to rapidly create and deliver content to the web. Personalized, adaptive learning content increases learning retention and decreases time spent in training.

Rapid content creation for faster delivery

- Deliver compelling, highly personalized learning experiences to the web in a fraction of the time required by conventional tools
- Manage development and deployment of content
- Quickly search and locate content from other courses or organizations

Easy-to-use open authoring

- Build learning content without having to master complicated proprietary authoring tools
- Create and edit content using popular web authoring tools such as Macromedia Dreamweaver, Microsoft FrontPage, PowerPoint and Word

Powerful assessment capabilities to evaluate performance

- Create powerful HTML-based assessments and evaluations without programming or scripting
- Choose from a rich array of built-in question types, including true/false, multiple choice, single and multiple fill-in-the-blank, image map, and un-judged essays
- Utilize advanced assessment settings, including flexible database-driven question pooling, skipping, randomization, timed response and auto advance

Robust repository services to allow global collaboration

- Share and manage content among geographically dispersed users, leveraging design time features such as sophisticated search, version control, and check-in/check-out

Unparalleled, adaptive content delivery capabilities

- Provide personalized learning experiences and real-time remediation through dynamically adapting content delivery, based on navigation and interactivity rules
- Deliver to tens of thousands of users, including external users, with no impact on the learning management system (LMS)
- Deliver hybrid-learning activities that combine online content and CD-ROM or hard drive-based multi-media

Unique tracking and LMS integration capabilities to improve learning performance

- Integrate seamlessly with TotalLMS™ for reliable content connectivity, security, session management, SCORM packaging, and integrated reporting
- Interoperate with any LMS based on standard (AICC/SCORM) interfaces
