

TotalLMS is the backbone of SumTotal's integrated learning, performance and talent management suite. The flexibility, power and ease-of-use of TotalLMS enables SumTotal Systems to offer the best-of-breed learning management system (LMS) with industry-first capabilities. The platform offers radically easier administration of learning activities, user organizations, e-commerce, reporting and compliance, as well as, unprecedented interoperability and integration with other technology applications and infrastructures - all without the need for programming and customization.

Provide instant access to information for business and management visibility

- Track and measure learning effectiveness with the reporting framework for out-of-the-box reports
- Customize reports with easy filtering and drag-and-drop capabilities from innovative Report Manager
- Track external, completed learning activities and "equivalency" activities

Quickly react to changes in the environment

- Easily re-map domains, with easy-to-use wizards, when organizational or business changes occur
- Segment user populations into audiences for easier, more flexible management and tracking

- Optionally share or restrict business rules on a domain-by-domain basis

Effectively strengthen performance of partners and customers

- Provide multiple payment options giving you flexibility for partner/customer training business models
- Utilize robust commerce capabilities to enroll and pay for learning activities including multi-currency support and discount management
- Track performance and certifications against business results effectively
- Consolidate management of decentralized groups and data into one system, while retaining their individual workflows and structures

TotalMS™

Increase your productivity

- Create and deploy true blended learning programs and single activities based on rules
- Provide single, automatic registration for complete learning plans
- Personalize and automate notifications based on user and training characteristics
- Work faster with more intuitive, user-focused features
- Leverage learning activities using tracks for different learner paths

Strengthen organizational talent

- Identify the talent needs, capabilities and gaps in your organization
- Easily assign competency requirements to various levels of your organization, linking competencies directly to relevant learning activities
- Quickly identify individuals within your organization with specific competency profiles using drag-and-drop reporting capabilities

Reduce costs and risk

- Leverage over 100 web services for real-time synchronization and integration with your learning and talent management portal
- Minimize customizations with a highly flexible architecture and 75% of the application exposed
- Eliminate administrative tasks based on business rules

Maintain audit readiness

- Full support for learning data auditing, including electronic signature methods required by auditing agencies such as US FDA and FAA
- Confidently pass audits with generated reports that demonstrate compliance with specific training requirements and proof of the validity of the data
- Assign time-based learning requirements and certifications across various segments of your user population
- Reduce liability of risks and costs by preventing compliance and certification lapses with notifications and expiration status
