

SumTotal[®] Expense Management

Manage expenses with one complete and configurable system

SumTotal Expense manages every aspect of business expense processing, including travel and entertainment (T&E), and easily integrates with all reporting systems. Manage compliance risks and adhere to spending and travel policies with one solution.

Control costs and compliance.

Efficient expense management and increased control improves your bottom line. SumTotal provides a highly intuitive and easy-to-use expense management solution, which gives you the ability to fully support your organization's growth and scalability. We make it easy to meet global requirements such as multiple currencies, languages, complicated taxation requirements and localized policies. Our solution improves compliance, enforces expense policies and procedures and increases spending visibility through data capture and reporting.

Manage all expenses in one place.

SumTotal Expense manages the entire range of employee expenses and related processes, including receipts management, feeds from all major credit card providers, hotel folio data, value-added tax (VAT) recovery and more.

“Increasing business travel, fraud, and poor spend visibility and control, on top of the need for greater system integrity and accurate reporting to meet the requirements of Sarbanes-Oxley legislation have led many organizations to seek automated solutions.”
